

lowadiabetes

Sub-Investigator | Advanced Practice Provider (NP/PA)

Feeling burned out by rushed visits, administrative burdens, and limited time to truly connect with patients?

At Iowa Diabetes, you'll practice medicine differently. Imagine life with more relaxed care and no EMR. A career spent transforming the future of diabetes and obesity.

Founded in 2007, **Iowa Diabetes** is a leading diabetes research and care organization in Central Iowa, dedicated to improving the lives of adults and children living with diabetes, obesity, and related conditions. Through comprehensive clinical care, patient education, and innovative research, our team has conducted over 250 clinical studies and continues to make a meaningful impact on both individual health and the broader community.

This is your opportunity to step into clinical research leadership — where quality replaces volume, patients are engaged and motivated, and innovation is part of your daily work. We are seeking a **Sub-Investigator (Sub-I)** who wants to help shape the future of healthcare while restoring balance and purpose to their own career.

How We're Different

We practice intentionally — in patient care, collaboration, and leadership. This is what truly sets us apart.

✓ Practice without pressure

No RVU treadmill. No double-booked schedules. No rushed visits. Just relaxed, thoughtful, patient-focused care.

✓ Restore patient connection

Our environment fosters motivated, invested, and engaged patients. This allows you to practice medicine the way it was meant to be.

✓ Drive innovation

Play a direct role in advancing therapies that will redefine the future and set new standards in patient care.

✓ **Enjoy true work-life balance**

Spend more time with patients. Practice relaxed care. Forget EMR. Enjoy predictable, daytime hours at a sustainable pace.

✓ **Join a culture that cares**

We work hard, invest in your success, value your expertise, and foster a culture where meaningful work and having fun go hand in hand.

✓ **Elevate your career**

Find the support and inspiration to grow professionally, embrace your full potential, and make a lasting difference.

Role Highlights

- **Job Type:** 1.0 FTE
- **Reports to:** Chief Operating Officer (COO) or Medical Director
- **Location:** On-site in West Des Moines, Iowa
- **Schedule:** Day shift; occasional evenings and rare weekends as required by study or patient needs

What You Bring to the Team

Required skills and qualifications:

- Minimum 2 years clinical practice experience
- Current, active, unrestricted NP, PA, or equivalent APP license in Iowa
- Prior clinical research experience or strong interest in research
- Commitment to patient-centered care and ethical research
- Proven communication, leadership, and organizational skills
- Strong analytical skills and attention to detail
- Ability to work collaboratively in multidisciplinary teams
- Strong commitment to ongoing education and growth

Preferred skills and qualifications:

- 5+ years clinical practice experience
- Knowledge of FDA regulations and ICH-GCP guidelines
- Board certified in Family Medicine, Endocrinology, or Internal Medicine
- Experience as Principal Investigator or Sub-Investigator
